XXIII. SPECIFIČNI POGOJI POSLOVANJA | SPECIFIC TERMS and CONDITIONS**Pogoji veljavnosti storitve | Terms of service validity**

Rezultati meritev navedeni v listinah, pričajo o stanju vzorca v trenutku opravljanja meritev in ne vsebujejo nikakršne informacije o njegovi dolgotrajni stabilnosti.

V kolikor naročnik ni podal točk pregled, ali le-te ne izhajajo iz druge smiselne zahteve, se bo pregled opravil enakomerno čez celotno merilno območje, pri čemer točke pregleda ne spreminjamo vsakokrat (naslednjič), razen če naročnik zahteva spremembo.

The results of measurements stated in the Charters, testify to the condition of the sample at the time of measurement and do not contain any information on its long-term stability.

If the customer has not provided examination points, or they do not result from another reasonable request, the examination will be carried out evenly over the whole measuring area, and the examination point will not be changed each time (next time), unless the customer requests a change.

Točke pregleda (meritev) | Examination (measurement) points

V kolikor naročnik ni podal točk pregled, ali le-te ne izhajajo iz druge smiselne zahteve, se bo pregled opravil enakomerno čez celotno merilno območje, pri čemer točke pregleda ne spreminjamo vsakokrat (naslednjič), razen če naročnik zahteva spremembo.

If the customer has not provided examination points, or they do not result from another reasonable request, the examination will be carried out evenly over the whole measuring area, and the examination point will not be changed each time (next time), unless the customer requests a change.

Naravnavanje in prejeta stanje | *Adjustment and As Found*

Če ima vzorec možnost naravnavanja s strani uporabnika, veljajo rezultati navedeni v listinah zgolj v primeru pravilno izvršenega naravnavanja, za kar mora poskrbeti uporabnik.

Stanje vzorca pred pregledom (prejeto stanje), če je podano na listini, predstavlja stanje vzorca pred morebitnim naravnavanjem / nastavitvijo / popravilo / itd. in je podano v eni kritični točki (če se krivulja linearnosti pri tem ne spremeni) ali v več točkah (če se krivulja linearnosti pri tem spremeni). Način in oblika podajanja prejetega stanja (v eni ali več točkah) je predhodna odločitev in temelji na znanju in izkušnjah, pri čemer bi rezultati morali zadoščati uporabniku pri sprejemanju odločitev povezani s prejetim stanjem. Uporabnik lahko vedno na podlagi rezultatov prejetega stanja dovolj dobro oceni stanje vzorca pred izvedbo. V nobenem smislu prejeto stanje ne odraža celovitosti prejetega stanja, ampak zgolj v obsegu kot je podana.

V kolikor rezultati prejetega stanja ne zadostujejo, se uporabniku lahko izda dve listini (ločeno za prejeto stanje in ločeno za končno stanje), kar se obračuna v vrednosti 175% cene storitve.

V kolikor posega v vzorec ni bilo ali se niso spremenile meroslovne značilnosti, je stanje pred enako končnemu stanju, zato podvajanje na listinah v tem primeru ni potrebno.

If the sample has the possibility of adjustment by the user, the results are valid only in the case of a correctly performed adjustment, which must be taken care of by the user.

Sample condition prior to examination (As Found) if specified on the charter, represents the condition of the sample prior to any adjustment / setting / repair / etc. and is specified at one critical point (if the linearity curve does not change) or at multiple points (if the linearity curve changes in the process). The method and form of presenting the as found condition (at one or more points) is a preliminary decision and is based on knowledge and experience, whereby the results should be sufficient for the user to make decisions related to the as found condition. The user can always evaluate as found condition of the sample sufficiently well before examination based on as found results. In no sense does the as found reflect the completeness of the received condition, but only to the extent that it is presented.

If the results of the received condition are insufficient, the user may be issued two charters (one for the received condition and one for the as left condition), which will be charged at 175% of the service price.

If there has been no intervention in the sample or no change in its metrological characteristics, the condition is the same as the as left condition, so duplication on the charter is not applicable in this case.

Vsi vzorci morajo biti za pregled pripravljeni (vsaj v stanju delovanja), zato se v primeru ko je potrebno vgraditi nov potrošni material, se le-ta vgradi, pri čemer se lahko strošek za ceno dela vgradnje in ceno potrošnega materiala in poveča, brez predhodnega obvestila naročnika.

If during the examination turns out that the sample needs to be pre-prepared, the customer shall be charged for the re-examination of the sample, whereupon the legal entity of the LOTRIČ group shall consult the customer in advance on the additional costs or the increase in price.

The price of the product shall not include the costs of transport/ shipping or other fees/ customs/ delivery/ installation/ assembly/ training/ etc., unless specifically indicated in the offer or contract.

If the product delivered by the manufacturer is not equipped with consumables (e.g. a battery), but the consumables are necessary for the examination to be carried out and for the product to function properly, they shall be installed, whereby the cost of installation and the price of the consumable material may increase without prior notification to the customer.

All samples shall be ready for examination (at least in functioning condition), therefore, if it is necessary to install new consumables, these shall be installed, whereby the cost of installation and the price of the consumable material may increase without prior notification to the customer.
